

What Our Clients Say About Acti-Zyme

"I thought it would do something, but I was surprised how well it removed all the sludge. There is literally nothing left. Incredible!"
Tim H. Hepburn, SK

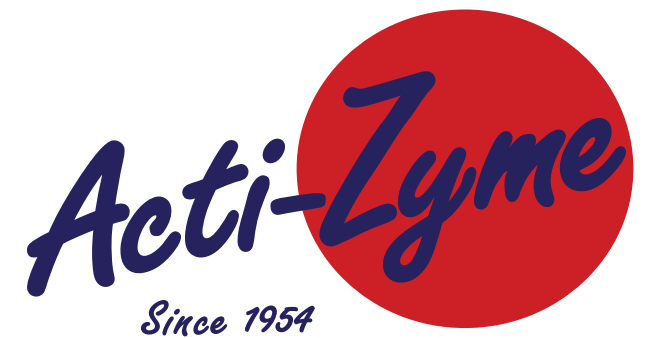

"Council is very pleased and are definitely committed to continuing with this product. This product has saved the Village of Vibank thousands of dollars." Jeanette S. Vibank, SK

"The Acti-Zyme Product is beautiful, it works wonders, miracles! For preventative maintenance purposes it is an excellent product. There is little to no sludge build at at. Your product breaks down anything organic" Jacob Tricker, AB

"We have used Acti-Zyme for 20 years. It is an amazing product. We use it in our lagoon, lift stations and man holes. The lagoon was cleaned out recently for the first time since 1990 with very little sludge. Our lift stations are almost odorless. The difference is day and night not using Acti-Zyme." Malcom Mathews, Foremost, AB

"We saw a very visible change in our lagoons in just 2 months after we started using Acti-Zyme. We have been using now for 8 years as needed. It has worked well for us. We decided to be more aggressive in using the product for better results. We saw a significant odor reduction and impressed with only a few inches of sludge on pipes. The cost of using Acti-Zyme is minimal in comparison to dredging.
Logan Howes, Nobleford, AB

Acti-Zyme AZ Commercial

Acti-Zyme AZ Commercial is the all purpose baseline product used for proper management of wastewater and acts as a preventative maintenance in lagoons, collection lines, and for continued sludge management.

"After one year our sewer lines are clear, no fat, they are spotless. Acti-Zyme doesn't do exactly what they say it would do, it does more. I am an advocate, because it works. William Lyons, Bow Island, AB

Acti-Zyme AZ+

Acti-Zyme AZ+ is for Sludge Removal and Lagoon Remediation. Speeds up the process of decomposition during initial treatments and assists in balancing the pH levels.

"Wow, what an amazing difference, we are extremely pleased with the results. We would be happy to recommend this to anyone!"
Karen Fegan, Delburne, AB

Acti-Zyme LS7

Acti-Zyme LS7 is an enhanced product for improved treatment and management of fat, oil and grease built up in lines, lift stations, and grease traps.

"I have seen sludge build up 4 inches thick in pump stations, and seen it eaten away within 2 to 3 weeks after using the product. The walls were clean. Any of our traps or weirs is spotless. It is a fabulous product." Jacob Tricker, Alberta

*Full 24 km Pipeline Rehabilitation within 1 month.
No manual removal needed when using Acti-Zyme.*

*71% sludge reduction in one year, at 24% the cost of manual removal.
No manual removal needed when using Acti-Zyme.*

The transformation of a heavily overloaded lift station over 6 weeks using Acti-Zyme. No heavy equipment or labour needed.

Non-toxic, all natural, biological technology for rehabilitation and maintenance of wastewater systems.
